I am seeking a challenging position as a Web Developer intern, where I can apply my knowledge and skills in MERN STACK to contribute to the development and maintenance of dynamic and user-friendly websites. With a strong attention to detail and a passion for problem-solving, I am eager to learn and grow in a fast-paced and collaborative work environment.

EDUCATION

University Of Karachi (UBIT)

Computer Science • Jan 2021 - Present

DJ Science College

Field of study • Jan, 2018 - 2020

PROJECTS

- **FOOD DELIVERY APP:** Designed and implemented a web application for food delivery, cart and keeping track of orders. Developed using React.js, Node.js, Express.js, MongoDB, and Bootstrap.
- **ECOMMERCE-STORE:** Web Application created Using ReactJs and used firebase as a backend, also added authentication using firebase.
- **EXPENSE-TRACKER:** Web App created using ReactJs and used firebase as a backend, using this app user can keep track of his income and expense while keeping balance upto date.
- **REALTIME-CHAT-APP:** Chat app is developed by me, it has first user loginpage and then it will asked for which room he wants to go in order to communicate with other person within the same room. Its a good basic project which i have completed while learning react.
- **QUEUEING MODELS:** Developed a queueing model web application using Html, Javascript and Css, enabling simulation and analysis of queueing systems to optimize efficiency.
